Pancreatic Cancer: From Molecular Basis to Therapy

Message from the Guest Editors

Pancreatic ductal adenocarcinoma (PDAC) is one of the most aggressive forms of cancer and the seventh leading cause of cancer-related deaths worldwide. The molecular biology of PDAC is still poorly comprehended; nevertheless, newly noteworthy improvements have been made with the identification of molecular subtypes. While treatment strategies based on histopathological criteria supported by strong data are well proven in many cancer types, subtypes of PDAC are not currently used for treatment decisions. Yet, increasing molecular data are outlining subgroups in PDAC with different biology and potential precise therapeutic susceptibilities, offering the chance to describe a novel clinically valid molecular taxonomy.

This Special Issue aims to shed light on current knowledge regarding the molecular subtyping of PDAC and unravel forthcoming approaches for using a molecular taxonomy to guide therapeutic advance and conventional therapy with the overall goal of improving outcomes for this disease.

We warmly welcome submissions, including original papers and reviews, on this widely discussed topic.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
