Periodontitis: Molecular Mechanisms of Pathogenesis and New Approaches to Therapy

Message from the Guest Editors

In this Special Issue, we will publish high-quality original papers and comprehensive reviews demonstrating/discussing important aspects of pathogenetic processes, including molecular mechanisms of PD and experimental studies on novel promising approaches to PD therapy. This Special Issue is supervised by and , and assisted by our Topical Advisory Panel Member Dr. Pawel Plakwicz (Medical University of Warsaw).

*An early bird discount will be available for submission before 31 september 2022.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.
