Molecular Mechanisms and Pathophysiology of Cerebral Ischemia

Message from the Guest Editor

Cerebral ischemia is the leading cause of death worldwide. Despite great efforts to develop potential treatments, the molecular and cellular mechanisms of cerebral ischemia are not fully understood. Diverse mechanisms of pathophysiological events in ischemic damage have been suggested, including the activation of glutamate receptors, a sustained increase in intracellular calcium, oxidative stress caused by free radicals, and the activation of resident microglia related to neuroinflammatory reactions. In addition, the dysfunction of cells related to the blood–brain barrier (BBB), including endothelial cells, astrocytes and pericytes, as well as microglia, is also suggested as a possible mechanism of ischemic injuries. This Special Issue aims to study the control or modulation of diverse pathways during or after ischemic injuries at the molecular and cellular levels to prevent, attenuate or heal ischemia damage following various brain ischemic insults.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
