

Special Issue

Signaling Pathways of Skin Tumors

Message from the Guest Editor

This Special Issue of *IJMS* welcomes scientific contributions and critical reviews analyzing the signaling pathways of skin tumors. In many of skin tumors, dysregulated signaling pathways will be responsible for tumorigenesis, malignant transformation, tumor proliferation, tumor progression, and tumor metastasis. Potential topics include but are not limited to the following:

- Wnt signaling;
- Sonic Hedgehog signaling;
- BMP signaling;
- Notch signaling;
- TGF signaling;
- AKT/mTOR signaling;
- Hippo-YAP signaling.

Guest Editor

Dr. Takamichi Ito

Department of Dermatology, Graduate School of Medical Sciences, Kyushu University, Fukuoka 812-8582, Japan

Deadline for manuscript submissions

closed (30 June 2020)

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
