# Peripheral Targets in Obesity: Pathologies and Therapeutics

### Message from the Guest Editor

Obesity is a significant social and financial burden, in developed and developing countries. Alarming, the incidence of obesity is increasing significantly worldwide, in both adults and children. Of concern, obesity and its associated pathologies (including, but not limited to, Type 2 Diabetes Mellitus (T2DM), kidney disease and cardiovascular disease), increase morbidity and mortality and reduce the quality of life irrespective of age, sex or culture. Obesity often is the result of an disparity between nutritional intake, energy expenditure and energy storage. Emerging research in the area of pathophysiology associated with obesity, has identified a clear role for the periphery in the maintenance of the obese state. Further, the periphery plays a significantly role the link between obesity and complex diseases, such T2DM, kidney disease and cardiovascular disease. As a consequence, effective therapeutics for obesity require a consideration for the peripheral abnormalities associated with obesity in addition.

### Guest Editor

Dr. Deanne H. Hryciw

School of Environment and Sciences, Griffith University, Nathan, QLD 4111, Australia

### Deadline for manuscript submissions

closed (31 August 2020)

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,  
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle  
Marche, Via Ranieri 65, 60100 Ancona, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore  
- Q1 (Organic Chemistry)
