

## Special Issue

# Antiviral Drugs and Virus Infection

### Message from the Guest Editors

Over the years, *IJMS* has been publishing high-quality research articles on molecular studies in biology and chemistry, with a strong emphasis on molecular biology and molecular medicine. This Special Issue will be devoted to the mechanism of virus infection, including the participation of host factors in infection and in the defense against virus infection. It is well established that new and potential antivirals are needed for the treatment of all viral infections. This Special Issue of *IJMS* will also cover research on the mechanisms of drug susceptibility and resistance. Research articles on all viruses (including plant viruses) are welcome for submission.

Prof.

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
