

## Special Issue

# Physical Energies and Morphogenetic Signaling

### Message from the Guest Editor

Understanding how biological information is shaped from the nanoscale level of molecular/supramolecular interactions to the subcellular and cellular level, up to the pattern control of large-scale anatomy and morphogenesis is currently posing a number of unanswered questions, and boosting novel strategies for regenerative and precision medicine.

This Special Issue aims at providing a platform for basic and translational science, publishing innovative research and review articles contributed by eminent Scientists who have been using physical energies, including electromagnetic fields, light and mechanical vibrations, eventually exploiting the growing development in electronics and artificial intelligence (AI), to target (stem)cell/tissue morphogenesis and regenerative potential.

Authors' contributions are not restricted to a particular field of morphogenesis and regeneration, and can also span through all models of degenerative diseases, including malignant transformation and rescue.

---

### Guest Editor

Prof. Dr. Carlo Ventura

Department of Medical and Surgical Sciences, School of Medicine,  
University of Bologna, Via G. Massarenti 9, 40138 Bologna, Italy

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Editor-in-Chief

Prof. Dr. José L. Quiles  
Department of Physiology, Institute of Nutrition and Food Technology  
"Jose Mataix", Biomedical Research Center, University of Granada,  
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
