

## Special Issue

# Role of Phytochemicals and Structural Analogs in Cancer Chemoprevention and Therapeutics

### Message from the Guest Editor

Cancer has always been the leading cause of death worldwide. Although there are many highly advanced treatments for cancer, chemotherapy still plays a vitally important role in this regard. The main ingredients of chemotherapy drugs are largely derived from plant ingredients, and these plant ingredients have exceptional therapeutic effects. Therefore, we hope that through the latest research, an increasing number of novel compound structures and mechanisms of action can be found. In the future, they will be used in some difficult-to-treat cancers. It is also hoped that, through more research, chemotherapeutic drugs with better pharmacokinetics can be developed. Importantly, the exact active ingredient of a particular plant extract must be reported in the submitted research manuscripts, since papers describing the effects of mixed extractions from plants will not be accepted. Original research works, communications as well as reviews in the field are welcome for this Special Issue.

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore  
- Q1 (Organic Chemistry)
