Molecular Mechanisms of Plant Defense against Abiotic Stress

Message from the Guest Editor

The abiotic stress factors, limit plant growth and crop productivity. These factors alter morphological, physiological and biochemical processes of the plants, as their intensity, frequency and duration increase as a result of climate change. In recent years, extensive studies have been made to understand the effects and mechanism of tolerance of plants to environmental stressors, but the exact mechanisms are not fully understood. It is well known that plant species have different sensitivity to stress factors. For this reason, evaluating the impact of abiotic stress factors on the growth, physiology and biochemistry of the different plant species are of great importance. Having in mind, that photosynthesis is strongly affected by abiotic stress factors, it is very important to study their influence structure and functions of the photosynthetic apparatus. Scientists from all over the world are invited to submit original research and review articles on topics related to plant defense mechanisms.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
