

Special Issue

Plants and Diabetes: Description, Role, Comprehension and Exploitation

Message from the Guest Editors

Many plants have been known to have medicinal values with potential beneficial effects on health for centuries. Phytoterapeutic compounds are well known to play a globally significant role, in particular in the management and treatment of various chronic diseases. The focus of the proposed Special Issue is the potential role of plants in the management and treatment of diabetes. The main topics include but are not limited to:

- Description of plants used in the management and treatment of diabetes.
- Use of plants for diabetes prevention/management.
- Chemical composition and functional properties. The elucidation of the main components and their properties.
- Delineation of the mechanisms of action; *in vitro* and *in vivo*.
- From plants to natural active compounds and/or ingredients: formulation of nutraceuticals, botanicals and dietary supplements, functional foods towards anti-diabetic drug development; profile and study of mode of action of antidiabetic formulations.
- The spectrum of multi-components of antidiabetic effects: description and therapeutic strategies.
- Identification and validation of new targets.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
