

Special Issue

Functional Porous Materials – Relationship between Structure and Properties

Message from the Guest Editors

Studies are especially welcome, where a strong emphasis is placed on the understanding of the relationships among the chemical structure, morphology and physico-chemical properties. Reporting the in-depth characterization of new porous functional materials using a wide range of complimentary experimental techniques (e.g. LV-SEM, HR-TEM, NMR, ssNMR, SANS, SAXS, etc.), and the development of new testing and benchmarking protocols focusing on specialty applications are also welcome. The development of new physico-chemical characterization methods aiming to understand the relationships among materials structural characteristics and application related performance are well within the scope of this special issue. Our cordial opinion is that this special issue in IJMS provides a professional open-access forum for the dissemination of scientifically well-founded and high quality original results in a leading journal of materials science and physical chemistry.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
