Probiotics in Human Health and Diseases

Message from the Guest Editor

Probiotics have shown significant human health benefits for the majority of human diseases. Probiotics are predicted to be useful in the prevention and therapy of diseases such as diabetes, obesity, cancer, cardiovascular dysfunctions, inflammatory bowel diseases, neurological disorders, and other chronic diseases. Significant advancements have been made in microbiome and probiotic research. These include the development of mechanism-based probiotics, novel delivery methods such as micro/nanocapsules and powders, the design of probiotic formulations in food and drinks, and other innovations. This Special Issue will cover the state of the art of research in probiotics' role in human health and disease. Both original research articles and reviews on this subject are welcome.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
