Special Issue

Psoriasis (PsO) and Psoriatic Arthritis (PsA)

Message from the Guest Editors

Psoriasis is a chronic and recurrent disease with the prevalence of approximately 2-3% in the general population. Significant improvements in psoriasis treatment are connected with the introduction of biological therapies that have changed patients' lives. however many questions still remain on how to enhance effectiveness of treatment based on molecular findings. The Special Issue "Psoriasis and Psoriatic Arthritis" will present the current knowledge on psoriasis and psoriatic arthritis with a special emphasis on pathogenesis and treatment. Articles on genetics of psoriasis, biological markers (from skin to blood), biological treatment - especially in relation to the outcomes of treatment are welcome. The differential diagnosis of psoriatic arthritis can be a difficult one - we would like to invite papers on this topic, as it can be a significant problem, especially in relation to osteoarthritis. The Special Issue would like to follow the psoriatic patient's journey into how the basic science may influence the treatment, using the translational medicine concept to give readers a deeper understanding of this complex disease.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences, Sez-Biochimica, Faculty of Medicine, Università Politecnica delle Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
