

## Special Issue

# Pharmacological Activities of Secondary Metabolites and Derivates of Medicinal Plants around the World

### Message from the Guest Editor

It is estimated that approximately between 64% and 80% of the world's population use medicinal plants to treat their health problems. In this sense, medicinal plants have been the source of many secondary metabolites to which numerous pharmacological activities have been attributed, in many cases giving rise to pharmacological treatments with important activity, which are currently used in therapeutics. Considering the above, the objective of this Special Issue is to encourage researchers to share their findings on medicinal plants from different regions of the world and the secondary metabolites isolated from them with a focus on the search for new pharmacological treatments that can be applied to treat diseases that are of importance worldwide. Importantly, the exact active ingredient of the plant extract must be reported in the submitted research manuscript, since papers describing the effects of mixed extraction from plants will not be accepted. and Dr. Miguel Valdes *team*

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore  
- Q1 (Organic Chemistry)
