Innovative Strategies in Cancer Therapy

Message from the Guest Editors

This Special Issue invites original research articles, systematic reviews, and opinion pieces focusing on the medicinal chemistry of cancer immunotherapy. We particularly welcome submissions reporting the synthesis and characterization of novel immunotherapeutic agents, structure-based optimization studies, chemical biology approaches to immune regulation, and the identification of small-molecule or synthetic biomarkers relevant to immunotherapy efficacy.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.
