

## Special Issue

# GABA Signaling in Health and Disease in the Nervous System, 2nd Edition

### Message from the Guest Editor

Gabaergic signaling is essential in the brain throughout development, adulthood, and aging. Indeed, gamma-aminobutyric acid (GABA) is involved in processes, such as proliferation, migration, and differentiation of neural progenitor cells, during neurodevelopment. Moreover, GABA was shown to control neuritogenesis and maturation of synapses. In the mature brain, GABA is considered the main inhibitory neurotransmitter, contributing to the excitatory/inhibitory balance. In fact, changes in this balance are often related to neuronal disorders and aging-related neurodegenerative diseases. Moreover, recent reports described hippocampal inhibitory neurons playing unsuspected roles, such as coding space and speed. Considering all this information, authors are invited to contribute to this relevant topic in neuroscience.

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Editor-in-Chief

Prof. Dr. José L. Quiles  
Department of Physiology, Institute of Nutrition and Food Technology  
"Jose Mataix", Biomedical Research Center, University of Granada,  
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
