Precision Medicine for Cancer-Associated Thrombosis: The Role of Biomarkers

Message from the Guest Editor

Cancer-associated thrombosis (CAT) is a significant cause of morbidity and mortality in cancer patients, often complicating treatment and impacting overall survival. While conventional risk assessment models exist, they often lack the precision needed to accurately identify individuals at highest risk. This Special Issue delves into the crucial role of precision medicine in refining our understanding and prediction of CAT, offering a path towards personalized prevention and treatment strategies. This Special Issue aims to explore the latest advancements in biomarker research related to CAT. We invite submissions that focus on the discovery, validation, and clinical application of biomarkers for risk stratification, early diagnosis, and prediction of treatment response in CAT. We welcome original research articles, reviews, and meta-analyses that address the challenges and opportunities of implementing biomarker-guided precision medicine approaches to improve outcomes for cancer patients at risk of thrombosis.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
