Immunopathogenesis and Novel Therapeutic Strategies for Systemic Lupus Erythematosus: Third Edition

Message from the Guest Editors

Systemic lupus erythematosus (SLE) is a connective tissue disease. Its diverse clinical presentations and involvement in all vitally important internal organs is challenging for treating physicians. SLE pathogenesis is complex. In the course of SLE, several immunological phenomena may be observed, such as the loss of tolerance to self-antigens, autoreactive T- and B-cell activation, the synthesis of autoantibodies, and the activation of interferon. In recent years, advances in immunology have translated into the identification of several molecular and cellular targets, the modulation of which may exert therapeutic potential in the disease. This Special Issue is designed as a platform to provide recent research advantages that focus on understanding the immuno-pathological mechanisms, biomarkers, and novel therapeutic strategies for SLE. Both review and research papers are welcomed. Please note that pure clinical or model studies are unsuitable for this journal, but clinical submissions with biomolecular studies are welcome.

Guest Editors

Prof. Dr. Marzena Olesińska

Department of Connective Tissue Diseases, National Institute of Geriatrics, Rheumatology and Rehabilitation, 02-637 Warsaw, Poland

Dr. Hanna Przepiera-Błędzak

Department of Rheumatology, Internal Medicine, Geriatrics and Clinical Immunology, Pomeranian Medical University in Szczecin, Unii Lubelskiej 1, 71-252 Szczecin, Poland

Deadline for manuscript submissions

closed (20 April 2026)

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
