Mitochondrial DNA and RNA in Human Disease

Message from the Guest Editor

A greater understanding of the mechanisms of mtDNA expression is clearly necessary to unravel the complex role of mitochondria in human disease and aging. Among these nuclear encoded proteins are factors required for mitochondrial transcription, RNA processing, and translation. It would be remarkably interesting to discuss the most recent advances in our understanding of the post-transcriptional processes of mtDNA gene expression, which represents an emerging field of research—in particular, the recent discovery of novel factors required for modification and maturation of mtRNAs, the characterization of mtRNA granules as sites for organization of mtRNA processing, the biogenesis and composition of the mitoribosomes, and the coordination required for concerted nuclear and mitochondrial gene expression. Keywords

- mitochondria
- RNA processing
- RNA granules
- mitoribosomes

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
