

## Special Issue

# RNA Modifications and Epitranscriptomics

### Message from the Guest Editor

In this Special Issue, we will highlight RNA modifications and epitranscriptomic regulation linked to development, disease, and biological functions. Specific chemical modifications on RNA have been proven to contribute an efficient method to finetune gene expression via post-transcription. Increasing evidence suggests that RNA-modifying enzymes can be potential drug targets in treating diseases such as cancer. In this issue, we aim to collect essential research papers and insightful review papers on the topics highlighted *below*:

- RNA modification and disease
- RNA modification and development
- RNA modification regulators and their biological functions
- Methodologies for RNA modifications mapping
- Epitranscriptome
- Epitranscriptic therapeutic strategies

---

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore  
- Q1 (Organic Chemistry)
