MicroRNA/Long Non Coding RNA Networking in Cancer Therapeutics and Diagnostics

Message from the Guest Editors

This Special issue of the *International Journal of Molecular Sciences* will focus on recent advances in “MicroRNA/long Noncoding RNA Networking in Cancer Therapeutics and Diagnostics”, including new findings concerning miRNAs and long noncoding RNAs as tumor suppressors or oncogenes by regulating one or several cancer hallmarks, including evading cell death, metastasis, drug resistance, and immunological escape; as well as emerging data on miRNA-lncRNA interactions that affect cell death regulation and mechanisms of resistance to therapy. The aim of this Special Issue is to present the latest research on the identification of new miRNAs/long noncoding RNA networking as a new opportunity to access better clinical management of malignancies.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.
