Cell Death in Cardiovascular Disease

Message from the Guest Editors

Cell death is the driving force behind many forms of cardiovascular disease. Given the limited regenerative capacity of the heart, any cardiomyocyte loss during acute injury or chronic illness will have profound effects on cardiac remodeling and function. Further delineation of the various cell death pathways that contribute to cardiovascular disease is required for their therapeutic targeting, in order to fortify the heart and preserve life. For this Special Issue, we are recruiting both manuscripts or review articles that focus on cardiac cell death—any “-osis” is welcome. Everyone from early career academics to established investigators are encouraged to submit insightful works on the topic of cell death.

Guest Editors

Dr. Jason M. Karch

Cardiovascular Research Institute, Department of Integrative Physiology, Baylor College of Medicine, One Baylor Plaza (BCM335), Houston, TX 77030, USA

Dr. Joseph W. Gordon

Children's Hospital Research Institute of Manitoba, Winnipeg, MB R3E 3P4, Canada

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
