TGF- β Signaling in Immunity, Inflammation, Fibrosis and Cancer

Message from the Guest Editors

Due to its role in immune homeostasis, perturbations of TGF- β signaling underlies inflammatory diseases. Many chronic inflammatory diseases are marked by fibrosis, which concurs with excessive deposition of the extracellular matrix, resulting in the loss of normal function of the affected organs. The TGF- β family also plays essential roles in the initiation and progression of fibrosis, through the activation of fibroblasts towards a myofibroblast phenotype. During the early stages of tumorigenesis, TGF- β may act as a tumor suppressor by inducing cytostasis and apoptosis of preneoplastic cells. However, at later stages, when cancer cells have acquired oncogenic mutations that allow escaping from TGF- β tumor suppressor function, it becomes a tumor promoter by stimulating tumor cells to undergo epithelial-mesenchymal Transition (EMT), which increases migration and invasion. TGF- β is also central to immune suppression within the tumor microenvironment, and recent studies have revealed roles in tumor immune evasion and poor responses to cancer immunotherapy.

Guest Editors

Dr. Isabel Fabregat

1. TGF- β and Cancer Group, Oncobell Program, Bellvitge Biomedical Research Institute (IDIBELL), Barcelona, Spain
2. CIBEREHD, National Biomedical Research Institute on Liver and Gastrointestinal Diseases, Instituto de Salud Carlos III, Madrid, Spain

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
