

Special Issue

Oral Potentially Malignant Disorders and Oral Cancers: From Molecular Pathology to Therapeutic Approaches

Message from the Guest Editors

This Special Issue aims to bring together cutting-edge research focused on the molecular pathology of oral potentially malignant disorders (OPMDs) and oral cancer, along with translational approaches that can promote innovation in therapy. Our goal is to provide a platform for researchers, clinicians, and translational scientists to share insights that bridge the gap between molecular science and clinical application, ultimately fostering the development of more effective, personalized approaches to oral cancer prevention and treatment. We warmly invite you to contribute to this Special Issue and help shape the future of oral cancer management. Original research articles, comprehensive reviews, and short communications that explore molecular biomarkers, signaling pathways, proteomic and genomic alterations, tumor microenvironments, immune responses, microbiota, and the development of novel diagnostic or therapeutic strategies are all welcomed for evaluation in our Special Issue. By bridging fundamental science and translational innovation, this collection seeks to advance precision medicine approaches and improve outcomes for patients with oral cancer.

Guest Editors

Prof. Dr. Ana Caruntu

1. Department of Oral and Maxillofacial Surgery, Faculty of Dental Medicine, Titu Maiorescu University, 031593 Bucharest, Romania
2. Department of Oral and Maxillofacial Surgery, Carol Davila Military University Hospital, Bucharest, Romania

Dr. Nicholas Kalavrezos

Head and Neck Surgery, University College London Hospital (UCLH), London, UK

Deadline for manuscript submissions

20 August 2026

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
