Periodontal Disease: From Pathogenesis, Diagnosis to Treatment

Message from the Guest Editor

Periodontal disease is one of the most common chronic inflammatory diseases affecting global populations. Significant efforts over the past few decades have improved our understanding of its molecular pathology and potential treatment. Despite these advancements, there are still gaps in the comprehensive management of periodontal disease. More molecular research is needed to fully elucidate the host-microbe interactions and the impact of systemic health on periodontal conditions. Furthermore, the development of more effective and accessible point-of-care (POC) diagnostic tools and selective therapies that can eliminate oral pathobionts while preventing dysbiosis in the oral cavity remains a critical need. These advances are essential for improving periodontal disease outcomes and achieving better overall oral health.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
