Therapeutic Targets in Pancreatic Cancer

Message from the Guest Editors

In this Special Issue, we aim to cover all aspects of the current landscape of translational research in pancreatic cancer: prognostic and predictive biomarkers, molecular targeting, DNA damage and repair, targeted and immune therapies, and mechanisms of tumor defense. Translational and basic approaches are welcome; immunological aspects in the pre-clinic as well as in the patient are desirable. Genetic approaches in prospective patient cohorts (e.g., within the ongoing clinical trials), which are translationally obtained and molecular characterization of tumor tissue for better treatment selection, are also of interest. We would like to take a look at new preclinical strategies for the treatment of pancreatic cancer, especially new targets for therapy or for the avoidance of resistance to radiation and/or chemotherapy. Pure evaluations of existing cohorts are only accepted in exceptional cases. A translational approach should always be recognizable.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
