

Special Issue

Quantitative Mass Spectrometry of Small Molecules to Proteins

Message from the Guest Editor

The use of mass spectrometry to help elucidate chemical systems has grown significantly in recent years. Often coupled with chromatography, quantitative measurements can be achieved in a surprising number of systems. Mass spectrometry-based analyses can examine small molecules used drug discovery to mapping of metabolomes and proteomes. Directed analysis can obtain quantitative results in complex matrices. The goal of this special issue is to explore the wide variety of systems that can be explored by quantitative mass spectrometry.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
