

Special Issue

Yield, Plasticity and Ultimate Properties of Solid Polymers

Message from the Guest Editor

The mechanical properties of solid polymers have been known for many years. Over the past twenty years, in this domain, there has been tremendous progress in fundamental polymer physics. This progress has been made possible by the development of new experiments regarding the dynamics of polymers in confinement, dynamics of fluorescent probes, in situ dielectric, or NMR spectroscopy. Studies of the ultimate properties and the corresponding microscopic mechanisms have benefited from progress in electron microscopy, ultra-small-angle scattering techniques, and in acoustic detection for studying, e.g., cavitation event statistics. New techniques that combine atomic force microscopy and dielectric or Raman spectroscopy are being developed to probe polymer properties on a local scale. Theoretical developments have led to new mesoscopic models that can describe the plastic properties of glassy polymers in a quantitative way and consistently with the basic requirements of statistical physics. This Special Issue of the *International Journal of Molecular Sciences* will highlight these new trends and achievements.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
