

## Special Issue

# Sphingolipids: Metabolic Functions and Disorders 2.0

### Message from the Guest Editor

A strong case is emerging that bioactive sphingolipids, although only a minor constituent of the global lipid milieu in cells and tissues, play a central role in regulating metabolic functions. Specific bioactive sphingolipids have been identified as pathogenic mediators in metabolic disorders such as non-alcoholic fatty liver disease (NAFLD), diabetes, or cardiovascular dysfunction. Circulating mediators that are released from adipose tissue (e.g., adipokines, inflammatory cytokines) specifically modulate enzymes that are involved in sphingolipid synthesis and degradation. The accumulation of specific sphingolipid species in tissues such as the liver, muscle, heart, pancreas, and vasculature may contribute to the onset and development of metabolic diseases including insulin resistance, pancreatic  $\beta$ -cell failure, liver dysfunction, neuro-muscular degeneration, cardiomyopathy, and vascular and microenvironmental dysfunctions.

### Guest Editor

Dr. Elisabetta Meacci

Department of Experimental and Clinical Biomedical Sciences "Mario Serio", University of Florence, 50134 Firenze, Italy

### Deadline for manuscript submissions

closed (31 May 2022)

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,  
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle  
Marche, Via Ranieri 65, 60100 Ancona, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore  
- Q1 (Organic Chemistry)
