

Special Issue

Steroids, Central Neurotransmission, Mood, Memory and Mental State

Message from the Guest Editor

Steroid hormones secreted by the gonads and adrenal glands affect mood, memory, and mental state in humans. Thus, for example, the increased incidence of mood disorder around the time of menstruation, puerperium, and the menopause has been associated with the coincident fall of plasma estradiol concentrations. Estradiol has also been implicated in and used as adjunct treatment for schizophrenia. This Special Issue will review the themes outlined above with a focus on novel fundamental and clinical advances.

Guest Editor

Prof. Dr. George Fink

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
