

Special Issue

State-of-the-Art Cancer Immunotherapies—2nd Edition

Message from the Guest Editors

The current global success in the protection against COVID-19 through vaccination has proved the effectiveness and safety of the mRNA vaccine delivered by lipid nanoparticles. Such breakthroughs, including cancer vaccination; adoptive cell transfer therapy using CAR-T cells, TCR-T cells, and iPS cell-derived cells; immune checkpoint inhibitors; antibody therapy; dendritic cell therapy; and molecular targeting therapy, have greatly improved cancer patient outcomes. However, the overall survival rate is still unsatisfactory; therefore, it is necessary to much better understand the molecular mechanisms of cancer development and progression in the immunosuppressive tumor microenvironment.

In this Special Issue, we will focus on the latest advances in research on cancer immunotherapy ranging from basic research to clinical aspects that may advance our understanding of human cancer. Since IJMS is a journal of molecular science, pure clinical studies such as case reports will not be suitable for submission, but clinical submissions such as biomolecular experiments are welcome.

Guest Editors

Prof. Dr. Takayuki Yoshimoto
Dr. Takuma Kato
Dr. Hisashi Nagase

Deadline for manuscript submissions

closed (20 August 2025)

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
