Molecular Regulators In Obesity and Diabetes

Message from the Guest Editor

Worldwide obesity has nearly tripled since the time of the Green Revolution that boosted the production of grains approximately 2.5 times. Obesity reduces not only life expectancy but also Healthy Life-Years due to its number of serious complications including type 2 diabetes, cardiovascular disease, hypertension, certain cancers, and stroke. Thus, obesity and related diseases create burdensome health care and other economic costs for society. Growing obesity is a multi-faceted problem that will require many levels of public action. Our responsibility as members of the scientific community is to uncover novel mechanisms underlying the development of obesity and type 2 diabetes, and to develop therapeutic strategies to prevent these diseases for the health and welfare of society. For submission to this issue, both original research articles and comprehensive review papers are welcomed.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
