Special Issue

Immune Thrombocytopenia: Molecular Pathogenesis, Diagnosis, Drug Resistance and Treatment

Message from the Guest Editor

Immune Thrombocytopenia (ITP) is an autoimmune disorder, which is based on first discarding other conditions that could be associated with thrombocytopenia. Given the growing interest in ITP disease, the International Journal of Molecular Sciences is launching this Special Issue. We encourage you and your co-workers to submit articles reporting on ITP. Reviews or original articles dealing with different aspects of molecular biology and ITP: usefulness of molecular techniques for diagnosis, genetic susceptibility to develop ITP, refractoriness to treatment with current drugs used for this disease, usefulness of molecular biology as predictors of response or as markers of interruption of TPO-RAs are just some of the possible targets of this Special Issue. In addition, we warmly invite you to submit articles reporting on less frequent types of ITP, e.g., ITP secondary to autoimmune or infectious diseases and lymphoproliferative disorders, drug-induced ITP, etc., and their potential molecular insights. We look forward to receiving your contributions and realizing an interest in completing this Special Issue!

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences, Sez-Biochimica, Faculty of Medicine, Università Politecnica delle Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
