

## Special Issue

# TRP Channels in Cancer: New Avenues for Diagnosis, Prognostication, and Therapy

### Message from the Guest Editor

Transient Receptor Potential (TRP) channels are multifunctional signaling molecules, with important roles in cell growth and differentiation. Several TRP channels show altered expression in cancers, though it is unclear if this is cause or consequence of the disease.

Regardless of the underlying pathology, this altered expression can be used for cancer diagnosis and prognostication. Furthermore, such altered TRP channel expression may constitute a novel therapeutic target. This Special Issue will explore the current state of this rapidly evolving field, from the role of TRP channels in malignant transformation, cancer growth and metastasis, through the use of altered TRP channel expression in cancer diagnosis and prognostication, to targeting TRP channels to kill cancer cells or relieve cancer pain. Experimental studies with tumor cell lines and/or animal models of human cancer, critical review articles of old concepts and new thoughts are all welcome for consideration.

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore  
- Q1 (Organic Chemistry)
