

Special Issue

Molecular Research on Bacteria

Message from the Guest Editor

Research on bacteria remains an open field today due to the identification of emerging new species and clinical isolates resistant to most antibiotics in use. Fortunately, therapeutic approaches are evolving with the integration of new strategies, such as antivirulence therapies, drug repurposing, and phage therapy. On the other hand, new research is focusing on the use of bacteria for beneficial purposes, such as bioremediation and biorestitution. This Special Issue aims to collect the most recent original papers and reviews on bacteria, with particular relevance on a molecular level.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
