Endometrial Carcinoma: Current Insights and Future Perspectives

Message from the Guest Editors

Endometrial cancer (EC) is the most common cancer of the female reproductive tract in developed countries. Its incidence is continuously rising, along with its death rate, as the population is aging, the obesity rates are increasing, and the prognosis of certain types of EC, mainly non-endometrioid EC, remains debatable. For this Special Issue, we welcome the submission of original reports or comprehensive review articles addressing the current state of targeted therapy of EC or future perspectives emerging from the identification of promising novel targets for EC therapy.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.
