Functions of Transcription Factors in Plant Growth, Performance and Responses to Environmental Stresses 2.0

Message from the Guest Editors

In this Special Issue of *IJMS*, entitled “Functions of Transcription Factors in Plant Growth, Performance and Responses to Environmental Stresses 2.0”, we will focus on the important roles of TFs in plant growth and development, as well as in conferring stress-resistant mechanisms and their potential for being used for the enhancement of crop productivity based on advanced biological methods. Research papers and up-to-date review articles are all welcome.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.
