

## Special Issue

# Tree Genetic Engineering, Genome Editing and Genomics

### Message from the Guest Editors

The Special Issue “Tree Genetic Engineering, Genome Editing, and Genomics” aims to summarize all ongoing recent activities around the world on accelerated tree improvement for the production of more wood on less land, improving wood quality, increasing resistance to pests and pathogens, and increasing stress tolerance in the face of climate change, a major challenge to biodiversity.

As the of this Special Issue, we would like to invite you to participate in this venture by contributing a paper on the topic of your choice within the broad area covered by “Tree Genetic Engineering, Genome Editing, and Genomics”. You can contribute on more than one topic, and are free to have co-authors of your choice.

We are look forward receiving your contribution.

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore  
- Q1 (Organic Chemistry)
