Special Issue

Tumor Immunology & Immunotherapy

Message from the Guest Editor

Tumor induced immune suppression and tolerance mediated by T regulatory cells, myeloid derived suppressor cells (MDSC), tumor associated macrophages (TAMs) suppressive dendritic cells, TLRs and IL-10, TGFb and IL-8 in the tumor microenvironment inhibit active immune responses promoting tumor growth. These inhibitory molecular and cellular pathways have highlighted the need to find approaches disabling these dysfuntional immune suppressive mechanisms for precision immune therapy against cancer. We invite you to submit research articles, reviews and short communications on this topic of intense investigation.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences, Sez-Biochimica, Faculty of Medicine, Università Politecnica delle Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
