Tumor Immunology & Immunotherapy

Message from the Guest Editor

Tumor induced immune suppression and tolerance mediated by T regulatory cells, myeloid derived suppressor cells (MDSC), tumor associated macrophages (TAMs) suppressive dendritic cells, TLRs and IL-10, TGF β and IL-8 in the tumor microenvironment inhibit active immune responses promoting tumor growth. These inhibitory molecular and cellular pathways have highlighted the need to find approaches disabling these dysfunctional immune suppressive mechanisms for precision immune therapy against cancer. We invite you to submit research articles, reviews and short communications on this topic of intense investigation.

Guest Editor

Prof. Dr. Sherven Sharma

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles

Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
