Tumor Microenvironment 3.0

Message from the Guest Editor

The accumulation of gene mutations can transform normal cells into cancer cells, which are required, but not sufficient, to induce cancer tissues. Cancer development and its malignant progression unexceptionally proceeds under the influence of tumor microenvironments, which are governed by the communication between cancer cells and normal resident cells present in tumor tissues, such as leukocytes, endothelial cells, and fibroblasts. Moreover, normal cells present in tumor tissues frequently support the survival of cancer stem cells by providing them with niche, thereby inducing resistance to chemotherapy and radiotherapy. Thus, in order to identify druggable targets for exploiting efficient anti-cancer strategies, it is mandatory to clarify the interplay of cancer cells with intratumoral normal cells at molecular levels. Here, in this Special Issue “Tumor Microenvironments”, we will discuss various types of mediators including cytokines, chemokines, extracellular vesicles, and lipid mediators, which are deeply involved in the interaction between cancer cells and normal cells in cancer tissues.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
