

## Special Issue

# Novel Insights into the Molecular Mechanisms of Pancreatitis

### Message from the Guest Editor

This Special Issue aims to discover and develop novel strategies or mechanisms, single compounds, natural products, or combination formulas with beneficial properties in various pancreatitis experimental models. Topics of interest also include pharmacokinetics, metabolism, pharmacology, and toxicology related to the use of drugs in pancreatitis. While the experimental drug mechanism is primarily centered on pharmacological research of new agents, novel pharmacodynamic and pharmacokinetic mechanisms that may explain or predict the molecular and cellular mechanisms of acute and chronic pancreatitis already in use and/or provide potential targets for drug development may also be welcome. In this Special Issue, we welcome molecular and cellular mechanism-focused original research, reviews, clinical trials, methods, and opinion articles.

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore  
- Q1 (Organic Chemistry)
