Role of Immune and Inflammatory Cells in Pulmonary Fibrosis

Message from the Guest Editor

Pulmonary fibrosis (PF), particularly idiopathic pulmonary fibrosis (IPF), is a progressive and fatal lung disease characterized by excessive extracellular matrix (ECM) deposition, which leads to scarring and impaired lung function. Immune and inflammatory cells play a pivotal role in the pathogenesis of PF, driving both injury and repair processes. We welcome research and review articles that address, but are not limited to, the following topics: Immune and Inflammatory Cells in Pulmonary Fibrosis: Macrophages, T cells, neutrophils, eosinophils, fibroblasts, and myofibroblasts; Immunology of Lung Mucosa in Pulmonary Fibrosis: Innate lymphoid cells (ILCs), tissue-resident memory T cells (TRMs), and alveolar epithelial cells (AECs); Cellular Therapy Using Immune Cells in Pulmonary Fibrosis: Mesenchymal stem cells (MSCs), regulatory T cells (Tregs), and macrophage reprogramming; Precision Medicine in Pulmonary Fibrosis: Integration of scRNA-seq and spatial transcriptomic data; Cellular Engineering in Pulmonary Fibrosis: Engineered immune cells, such as CAR-T cells targeting fibrotic pathways.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
