MicroRNA-200c in Cancer Generation, Invasion and Metastasis

Message from the Guest Editor

MicroRNA-200c is a non-coding small molecule RNA involved in the post-transcriptional regulation of genes, thus affecting various biological functions of the organism, and has become a hot research topic in the recent years. A large number of studies have demonstrated that microRNA-200c plays an important role in the invasion and metastasis of breast cancer, pancreatic cancer, non-small cell lung cancer and etc. This Special Issue welcomes molecular studies of microRNA-200c as an oncogene or oncogene suppressor or as a potent molecular marker, and the molecular mechanisms involved in the interaction between microRNA-200c and cancer will also be welcomed. Early diagnosis and clinical prognosis are beyond the scope.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
