Special Issue

Molecular and Cellular Aspects of Autoimmune and Inflammatory Rheumatic Diseases: Second Edition

Message from the Guest Editors

We are pleased to introduce a new Special Issue of the *International Journal of Molecular Sciences* that aims to focus on autoimmune and inflammatory rheumatic diseases. Knowledge is developing rapidly in the area of autoimmunity, which concerns both pathogenesis and treatment. We encourage the submission of original research and review papers dealing with the molecular and cellular aspects of autoimmune and inflammatory rheumatic diseases, focusing on disease mechanisms, potential biomarkers, and novel treatment options.

Guest Editors

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.
