

## Special Issue

# UV-B Signaling and Its Molecular Control in Plant

### Message from the Guest Editor

UV-B radiation can act both as an environmental stress factor and as an informational signal, and has been shown to regulate plant development and photomorphogenesis. The type of response to UV-B is determined substantially by the fluence rate of exposure. High fluence rates of UV-B produce reactive oxygen species and may cause damage to DNA, proteins, membranes, and lipids. At low fluence rates, UV-B is capable of promoting metabolic and developmental changes, such as biosynthesis of phenolic secondary metabolites and inhibition of hypocotyl elongation. It has been demonstrated that low fluence rates of UV-B stimulate expression of a range of genes that help protect plants against UV damage.

This Special Issue is aimed at providing selected contributions on advances in UV-B signaling and its molecular control in plants. Potential topics include, but are not limited to: UV-B perception and signaling by the UVR8 photoreceptor.

- UV-B perception and signaling by the UVR8 photoreceptor.
- Molecular understanding of UV-B signaling pathways.
- Signaling crosstalk between UV-B and abiotic stress.
- Potential application of UV-B in agriculture and horticulture.

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore  
- Q1 (Organic Chemistry)
