

## Special Issue

# Molecular Research Efforts in Urothelial Carcinoma

### Message from the Guest Editor

Based on the progress in molecular oncology and cancer genetics in urothelial carcinoma of the bladder (UCB), novel treatment options including immunoncology drugs, FGFR inhibitors or other targeted agents are approved or under development. Research efforts should lead to the discovery of novel predictive biomarkers in this emerging field. In addition to alterations in transcriptome and proteome, epigenetic factors, DNA repair mechanisms and non-coding RNAs have been proposed as pathogenic drivers, tumor suppressors and factors in treatment resistance and patient's clinical outcome. Thus, an improved understanding of the underlying molecular mechanisms in UCB development is of paramount interest, not only to optimize treatment outcomes but to improve cost effective management modalities in this important malignancy. Original research articles, review articles, as well as research letters covering the large field of cancer genetics, molecular oncology, cell biology and newly discovered prognostic biomarkers of urothelial carcinoma are strongly invited.

### Guest Editor

Prof. Dr. Georg C. Hutterer  
Department of Urology, Medizinische Universität Graz, Graz, Austria

### Deadline for manuscript submissions

closed (31 December 2018)

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
