Neurological Disorders: Molecular Pathology and Therapeutic Approaches

Message from the Guest Editor

We are currently inviting high-quality papers from outstanding scholars and research groups for this Special Issue, "Neurological Disorders: Molecular Pathology and Therapeutic Approaches", of the International Journal of Molecular Sciences. The topics are proposed for our Special Issue: Intracellular signalling networks in neurological disorders. Identification of new therapeutic targets. Genetics of neurological disorders: identification and treatment of mutations. Mitochondrial diseases and neurodegeneration. Gene therapy in neurological diseases: recent advances. Neuroinflammation in autoimmune disorders of the central nervous system. Impact of the microbiome on neurological health.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.
