

Special Issue

Regeneration for Spinal Diseases 4.0

Message from the Guest Editors

It is my pleasure to inform you about the Special Issue “Regeneration for Spinal Diseases”. Spinal diseases place a significant burden on the general population. The prevalence of degenerative spinal diseases, including intervertebral disc degeneration and osteoporosis, increases with age, and the affected population may suffer from long-term disability. The most serious conditions affecting the spine include spinal cord injury due to traumatic or non-traumatic causes (e.g., cancer, infection). Despite recent advancements in the management of these spinal diseases, there is growing research interest in discovering a novel therapeutic strategy. This Special Issue focuses on regenerative therapy for spinal diseases, including spinal cord injury, intervertebral disc degeneration, osteoporosis, and pseudarthrosis. It will be published in the *International Journal of Molecular Sciences* (*IJMS*, ISSN 1422-0067), and is now open to receive submissions of full research articles and authoritative review papers for peer-review and possible publication.

Guest Editors

Prof. Dr. Inbo Han
Dr. Takashi Yurube

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
