## Health Benefits of Catechins

### Message from the Guest Editor

Catechin is an important phenolic compound extracted from tea and other natural plants, it's the main substance of tea polyphenols to play the biological active role. The chemical structure of catechins shows that they contain multiple phenolic hydroxyl groups, one of the reasons for its biological function is the high activity of phenol hydroxyl group, which makes it the first to be attacked by foreign harmful substances and protect normal tissues from being damaged. Most research has shown that catechin have many functions, such as preventing cardiovascular diseases, anti-tumor, anti-oxidation. Therefore catechins are recognized as a natural, efficient, green and safe alternative to antibiotics. The study on the biological activity of catechins is of great social benefit to the development of drugs for the treatment of various diseases.

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore  
- Q1 (Organic Chemistry)
